Illuminate Your Passion

The Tennis Lamp™

The range combines the beautiful shape of the tennis ball with quality glass and low energy light sources.

The characteristic groove from the tennis ball is carefully cut into the surface of the lamp shade, creating a contrast between the surface and general shade color.

Depending on the color the contrast is more or less visible.

Materials: Quality glass from Germany
Shade: Diameter 12 cm
Surface: Satin - cut groove into the surface
Color: Optic Yellow, White sand, Orange, and Black

Designer Søren Momsen

Innovative Industrial Designer

Søren Momsen graduated from Denmark's Design School in 1997 as Industrial Designer specialized in lighting design.

Søren has won international design competitions such as "Lights of the Future" og "Lights of Tomorrow" by his ability to combine storytelling in light design borrowing elements from archetypical shapes.

With "The Tennis Lamp™" & "The Golf Lamp™", Søren Momsen and boasform has taken the sculpturally beautiful shape of the golf & tennis ball into a new dimension, creating a series of exclusive and timeless indoor lighting fixtures.
